It is for informational and educational purposes to allow the End user to upload images of skin conditions, seeking information and guidance. Just like a search engine, but instead of submitting text and looking at the images results. One submits an image and gets text back, for further information.

3.3. The Service permits users to upload images of skin conditions privately to receive 5 answers ranked in order of possibility, and can be read on an interface.

3.4. End user is anonymous and the uploaded images are NOT collected or stored. The image is only used to make the analysis.
